Subject: Adhesive Supply Hose - Stocked Inventory Phase 2 - Hoses Added

Bulletin 040317-09

To improve lead time fulfillment on ITW Dynatec adhesive hoses, our Operations team has implemented an improved approach to our hose production. The new system allows for significantly faster delivery of our most frequently ordered hoses. It also stabilizes lead-time issues that result from large quantity orders that would otherwise increase lead-times. Additionally, we will be providing more consistent lead-times for the remaining hoses in our product lines.

The Hendersonville facility will maintain a specified level of "finished goods" inventory of our highest volume hoses which are listed below. Effective immediately, the hoses listed will be available for shipment within 24 hours or same day shipment for urgent next day overnight delivery requests.

For quantities exceeding the Maximum Order Quantity listed below, customers should request a quoted lead-time from Customer Service.

Phase 2 part numbers added to the "finished goods" stocking list are highlighted below in orange.
